☒ The AXE ☒

The Smallest & Lightest Digital Pocket Scale on EARTH!

The brand new My Weigh AXE is the smallest and lightest digital scale in the world. However, it certainly it is packed with large features and a large weighing tray. It outperforms scales that are more then twice it's size.

The AXE is designed to be the most durable scale we have ever produced. It's extra lightweight- so if it is dropped the shock force will be much less then other pocket scales. Also we use a U-shaped twin load cell. By using 2 load cells, forces are distributed evenly and the shock / damage / overload resistance is more then doubled.

This cool scale comes complete with a durable Poly Hard Case, 3 lithium batteries and a Lifetime/30 year worldwide warranty.

Don't be fooled by it's miniature size, this little funky scale has a big **200g capacity and reads in precise 0.1g increments** The spinning protective cover is also the scale's weighing tray. This allows for a LARGE weighing surface.

- 2 key simple operation
- Lithium Batteries included
- Digital auto calibration
- 200 Gram Capacity
- Incredibly durable
- Heavy-duty hard case
- Less then 1/2 inch thick!
- Auto-off function to save power
- 1.75" average width ultra miniature size
- ULTRALIGHT - only 42 grams!
- Reads in Gram, Ounce, Troy Ounce & Pennyweight
- Large weighing area - entire surface of the scale!
- Weighing area has an innovative raised lip to prevent loose items from falling off the tray
- Lifetime/30 year Worldwide Warranty
- Available in metallic colors including AXE Silver, AXE Blue, AXE Red or AXE Black

Dimensions	3.25" x 1.75"avg (2" to 1.5" curve)
	8.5cm x 4.5 avg (5cm to 4cm curve)
Weight	42 Grams

The AXE spins open by turning the top 45°. When open the LCD and buttons are revealed. This unique design protects the buttons and LCD from damage when the unit is closed. Also by spinning open completely, the entire surface of the cover automatically becomes a large weighing platform. It's difficult to describe this process in words - but trust us - once you've seen an AXE in action, you'll fall in love with the amazing inspirational design. *It's "Weigh Cool"....*
