### HEAVY LIFTING IS WITHIN YOUR REACH

GSE Scale Systems' new Overhead Weighing line of instruments are designed for heavy duty industrial weighing applications such as steel service center processing, or heavy use warehouse operations. The M8000 Crane Scale and M8100 Tension Link both feature front panel access to Gross/Net Display, Maximum Hold, and Digital Tare Function. RF Control enables connection to a printer or PC. The Model 8100 Tension Link can be used for testing tension cables or function as a crane scale by using hooks and shackles. With so much capability, heavy duty weighing is easier than ever.

#### Model 8000 Crane Scale
