

### BCS 40 and BCS 80

The BCS 40 and BCS 80 are portable, light industrial bench "Briefcase Scales". These scales are extra durable and designed for weight checking, and all light industrial uses. They also make great shipping scales.

Their rugged portable design has made them a proven winner in the field for geology, refrigerant, archeology, and more! The ultra-portable design allows you to bring the scale to the item to be weighed - rather than bringing the item to be weighed to the scale!

The scale can also be removed from its case and installed as a regular shipping scale with an optional AC adaptor.

MODE	BCS40	BCS80
